Sneaker Secure

Authenticate & Track Your Sneakers

Key Features:

Instant Verification with QR code technology
–Scan any SneakerSecure QR code to instantly verify authenticity against our trusted database.

Detailed Sneaker Profiles
–Access information for each pair including manufacturing details, ownership history, high-resolution images, and unique identification codes.

Personal Collection Management
–Track your authenticated sneakers and maintain a record of your collection's history

Ownership History Tracking
–Each scan and transfer is recorded, creating a verifiable chain of ownership from manufacturer to current owner

How It Works

1. Each authentic sneaker includes a unique QR code linked to our secure database
2. Scan the code with the SneakerSecure app
3. Our system verifies the UUID against our trusted database
4. View detailed information and verification status
5. Add authenticated sneakers to your personal collection

Live Demo:
